

Hamburg/Tokyo, 25 February, 2020

WFO creates Floating Offshore Wind Committee chaired by global floating offshore wind industry expert Bruno Geschier

- WFO views floating offshore wind is an integral part of the offshore wind industry
- This industry-driven initiative shall promote the acceleration of commercial-scale floating offshore wind deployments worldwide
- Bruno Geschier (IDEOL) and Clément Weber (GREEN GIRAFFE) named Chairman and Vice-Chairman of the new Floating Offshore Wind Committee

World Forum Offshore Wind (WFO) and its members have always firmly believed that floating offshore wind is fully complementary to bottom-fixed offshore wind and creates tremendous new opportunities for the international offshore wind industry. In order to promote the acceleration of commercial-scale floating offshore wind deployments around the world WFO has launched a new and truly international industry initiative - the Floating Offshore Wind Committee. This new initiative aims at duplicating - if not outperforming - the installed capacity and cost competitiveness seen with bottom-fixed.

The Floating Offshore Wind Committee brings together not only international offshore wind industry leaders but also internationally recognized floating wind specialists - big and small - representing all aspects of the offshore wind value chain. As an industry-driven initiative the Floating Offshore Wind Committee has the following principal objectives:

- 1. Education, advocacy and policymaking**
- 2. Cost reduction and commercial-scale deployment**
- 3. Promoting the highest health and safety standards**
- 4. Engaging with environmental stakeholders and maritime space users**

This new initiative will be chaired by Bruno Geschier from IDEOL and co-chaired by Clément Weber from GREEN GIRAFFE. Offshore wind industry heavyweights and WFO members innogy and Northland Power have already confirmed to proactively participate in this exciting new initiative.

Bruno Geschier is the Chief Sales and Marketing Officer of IDEOL and is an internationally recognized and respected floating offshore wind expert and advocate. Bruno Geschier is the initiator and former chair of WindEurope's Floating Wind Work Group as well as the person behind the world's largest event solely dedicated to floating offshore wind (FOWT), where he serves as chairman of their scientific and technical committee / programming committee. He

is a regular speaker and chairman at numerous offshore wind events across the globe. He is fully committed to pursue his international advocacy work in favor of an accelerated implementation of floating offshore wind in the global renewable energy mix and looks forward welcoming key industry players in the Committee to assist him in his efforts.

Clément Weber is a co-founder of Green Giraffe a specialist advisory firm focused on renewable energy. In 2011, Clément opened the company's London office and managed Green Giraffe's UK activities before moving back to Paris in 2017 to become the Director of the Paris office. He coordinates Green Giraffe's efforts in floating offshore wind and has led several transactions in floating as well as bottom-fixed offshore wind, both on the equity and debt side. Recently, Clément closed two development funding transactions in floating offshore wind in California (700 MW, USA, 2018) & Hawaii (500 MW, USA, 2018).

About WFO:

World Forum Offshore Wind (WFO) is the world's only organisation 100% dedicated to fostering the global growth of offshore wind energy. WFO's international members represent the complete offshore wind value chain including utilities, manufacturers, service firms and other organisations. WFO is registered as a non-profit association (e.V.) in Germany with offices in Hamburg and Singapore. WFO's unique profile facilitates access to governmental and international forums in order to open new markets and to advocate for global offshore wind growth.
